**Attachments:** Hilcorp\_Energy\_FOV\_3\_14\_19.pdf; Hilcorp\_Energy\_CAA\_114\_RFI\_3\_14\_19.pdf

Eric,

Per my phone call to you just now, I am courtesy copying you on a finding of violation (FOV) and a follow-up CAA 114 information request that the EPA is sending to Hilcorp via certified mail.

The FOV is with regard to the San Jacinto 6E well. The EPA has determined that Hilcorp has violated the requirement under NSPS Subpart OOOOa, i.e., route all separated gas in the completion phase of natural gas production in compliance with reduced emission provisions, i.e., green completion requirements.

The follow-up 114 request is self-explanatory and follows up on Hilcorp's January 15 response in two areas.
